

Graphic arts - Bookbinding

DuranteVivan has the perfect adhesive solution with our range of hot melts to be used on the latest manufacturing equipment in the paper and packaging industry.

Bookbinding is a focus for us, as this industry touches our daily lives at home, school and work. Reliability and quality on the glue line is one of the key factors evaluated by our customers on the end product and in the manufacturing process.

ADVANTAGES

- ☒ High green strength
- ☒ Fast setting time
- ☒ Fast curing time
- ☒ Soft glue line
- ☒ Excellent melt stability

TECHNICAL DATA

Product name	Base	Fields of application
Duditerm PU 401	PUR	Suitable for nozzle and roller application. Milled and stiched spine.
Duditerm PU 401 LM	PUR LM	Suitable for nozzle and roller application. Milled and stiched spine. Low monomer emissions.
Duditerm 2201	EVA	Suitable for milled and stiched spine. Medium speed roller application.
Duditerm 2215	EVA	Suitable for milled and stiched spine. High speed roller application.
Duditerm 2250	EVA	Suitable for side gluing. Long open time and soft glue line.

PACKAGING AND STORAGE

EVA hot melts are packed in 25 kg plastic bags and may be stored for 24 months in temperature controlled areas. Our PUR hot melts are packed in 2, 20 and 200 kg sizes, sealed in aluminium bags and may be stored for 12 months.
